

**KEY**

-  Site boundary
-  Amenity grassland
-  Sports pitch
-  Play safety surface
-  Surfaced path
-  Boardwalk
-  Existing woodland
-  Proposed native woodland
-  Proposed native wet woodland

**Design Themes:**

The design focuses on the creation of an all season path, creating a circular walk accessing, wide reaching views and intimate spaces, within a maturing woodland. The higher ground is developed for **recreation, sports and play**, alongside seating and viewing spaces looking toward the further hillsides and historic fort feature.

Inspiration is taken from ground forms within the wider landscape, **relics of lookouts posts and hillforts**. Timber materials, benches and signage reference the **former railway station** at Heriot, with sinuous watery forms guiding the flowing paths which connect the hilltop to open meadows, woodland copses and boardwalk access to the wildlife pond and wet woodland habitats.
